- iii. Restricted units may not be physically clustered so as to segregate restricted and market-rate units within the same development or within the same building, but must be interspersed throughout the development, except that age-restricted and supportive housing units may be physically clustered if the clustering facilitates the provision of on-site medical services or on-site social services. Prior round affordable units shall be integrated with market rate units to the extent feasible.
 - iv. Residents of restricted units must be offered the same access to communal amenities as residents of market-rate units within the same affordable development. Examples of communal amenities include, but are not limited to, community pools, fitness and recreation centers, playgrounds, common rooms and outdoor spaces, and building entrances and exits.  - ii. Restricted units may be clustered, provided that the buildings or housing product types containing the restricted units are integrated throughout the development and are not concentrated in an undesirable location or in undesirable locations. Prior round affordable units shall be integrated with market rate units to the extent feasible.
 - iii. Restricted units may be of different unit housing product types than market-rate units, provided that there is a restricted option available for each market rate housing type. Developments containing market-rate duplexes, townhomes, and/or single-family homes shall offer restricted housing options that also include duplexes, townhomes, and/or single-family homes. The proper ratio for restricted to market-rate unit type shall be subject to municipal ordinance or, if not specified, shall be determined at the time of site plan approval.
 - iv. Restricted units must meet the minimum square footage required for the number of inhabitants for which the unit is marketed and the minimum square footage required

for each bedroom, as set forth in the Neighborhood Preservation Balanced Housing rules at N.J.A.C. 5:43-2.4.

- v. Penthouse and end units may be reserved for market-rate sale, provided that the overall number, value, and distribution of affordable units across the development is not negatively impacted by such reservation(s).
 - vi. Residents of restricted units must be offered the same access to communal amenities as residents of market-rate units within the same affordable development.  - c. Within rental developments, of the total number of affordable rental units, at least 13 percent, rounded up to the nearest whole number, shall be affordable to very low-income households. The very low-income units shall be distributed between each bedroom count as proportionally as possible, to the nearest whole unit, to the total number of restricted units within each bedroom count, and counted as part of the required number of low-income units within the development.

Supportive housing units whose sponsoring program determines the unit arrangement shall comply with all requirements of the sponsoring program. The standard may be met by having all one-bedroom units or by having a two-bedroom unit for each efficiency unit. In affordable housing developments with 20 or more restricted units that are age-restricted or supportive housing, two-bedroom units must comprise at least five percent of those restricted units.
