Re: IMO the Application of the Town of Dover, County of Morris
Docket No.: MRS-L-0000132-25

**Resolution of the Town of Dover Planning Board and 2025 (4th Round) Housing
Element and Fair Share Plan**

Dear Honorable Judge Allen:

This law office represents the Town of Dover (the "Town") in connection with the above referenced matter. Attached in connection therewith please find the following adopted by the Planning Board of the Town of Dover:

1. Town of Dover's 2025 (4th Round) Housing Element and Fair Share Plan (including Spending Plan), amended through February 4, 2026.
2. Dover Planning Board Resolution – In the Matter of Amendments and Updates to the Town of Dover Master Plan Concerning the Town's Fourth Round Affordable Housing Obligations, Decided and Memorialized on February 19, 2026.

Thank you for your consideration in this matter.

Very truly yours,
/s/ Dean J. Donatelli
Dean J. Donatelli

Housing Element

A. Introduction

The Town of Dover consists of a land area of 2.73 square miles, or approximately 1,747 acres, within Morris County, New Jersey. The town is bordered by Rockaway Town to the north, Borough of Wharton to the northwest, Mine Hill Town to the west, Randolph Town to the south, and the Borough of Victory Gardens to the east.¹

The New Jersey Municipal Land Use Law, N.J.S.A. 40:55D-1 to 136 (“MLUL”) and the New Jersey Fair Housing Act, N.J.S.A 52:27D-301 to -329 (“FHA”) require every municipal planning board to adopt a Housing Plan Element to its Master Plan and further require the governing body of each municipality to adopt a Fair Share Plan. More specifically, the FHA and MLUL require municipalities to adopt a Housing Element that addresses the municipal present and prospective housing needs, “with particular attention to low- and moderate-income housing.” In accordance with the Fair Housing Act at N.J.S.A, 52:27D-301, a Housing Element shall contain at least the following:

1. An inventory of the municipality's housing stock by age, condition, purchase or rental value, occupancy characteristics, and type, including the number of units affordable to low- and moderate-income households and substandard housing capable of being rehabilitated, and in conducting this inventory the municipality shall have access, on a confidential basis for the sole purpose of conducting the inventory, to all necessary property tax assessment records and information in the assessor's office, including but not limited to the property record cards;
2. A projection of the municipality's housing stock, including the probable future construction of low- and moderate-income housing for the next ten years, taking into account, but not necessarily limited to, construction permits issued, approvals of applications for development and probable residential development of lands;
3. An analysis of the municipality's demographic characteristics, including but not necessarily limited to, household size, income level and age;

¹ New Jersey Department of Transportation (NJDOT). (2022). *New Jersey Municipal Boundaries* [Review of *New Jersey Municipal Boundaries*]. NJDOT.
https://www.nj.gov/transportation/refdata/gis/maps/pol_subdiv_NO_Roads.pdf

4. An analysis of the existing and probable future employment characteristics of the municipality;
5. A determination of the municipality's present and prospective fair share for low- and moderate-income housing and its capacity to accommodate its present and prospective housing needs, including its fair share for low- and moderate-income housing; and
6. A consideration of the lands that are most appropriate for construction of low- and moderate-income housing and of the existing structures most appropriate for conversion to, or rehabilitation for, low- and moderate-income housing, including a consideration of lands reserved for developers who have expressed a commitment to provide low- and moderate-income housing.

The preparation and submission of a Housing Element of a Municipality's Master Plan, and a Fair Share Plan, is the first major step in the process for petitioning the New Jersey Courts for substantive certification.

Affordable Housing regulations define "Fair Share Plan" as follows:

"Fair Share Plan" means the plan that describes the mechanisms and the funding sources, if applicable, by which a municipality proposes to address its affordable housing obligation as established in the housing element, includes the draft ordinances necessary to implement that plan, and addresses the requirements of N.J.A.C. 5:93-3."

This Housing Element and Fair Share Plan ("Plan") satisfies all the applicable requirements set forth within the MLUL and FHA. Additionally, this Plan has been prepared in accordance with the requirements set forth within the Affordable Housing Reform Statute, P.L. 2024, c.2, which became effective on March 20, 2024.

History of Town of Dover's Affordable Housing Obligation and Fair Share Plan

The Town of Dover has a substantial history of providing its fair share of affordable housing for DCA Region 2. The Town of Dover began its Mount Laurel and Fair Share Housing Act compliance on July 24, 1996, when the Town adopted a Second Round Housing Element, which was followed by a petition to the then-Council on Affordable Housing (COAH) for substantive certification for the 1987-1999 period and receiving substantive certification on December 4, 1996 (Resolution No. 64-99). The Town was given a 6-unit Present Need or Rehabilitation obligation by COAH for the 1987-1999 period. The Town's Third Round obligation for the 1999-2025 period required an agreement with a Supreme Court-designated interest party, the Fair Share Housing Center (FSHC), following their report published on May 17, 2016. The FSHC report calculated a Present Need or Rehabilitation obligation of 312 units, Prior Round (1987-1999) obligation of 6 units, Third Round Gap Period (1999-2015) obligation of 105 units, and a Third Round obligation of 150 units. Following the submission of a settlement agreement

with the FSHC to the Court on June 16, 2016, a Third Round obligation of 178 units was established for the 1999-2025 period.²

On March 20, 2024, Governor Phil Murph signed the A-4/S-50 Bill, which required the Department of Community Affairs (DCA) to calculate and publish each municipality's Third Round present need (i.e. the number of housing units lacking complete kitchen facilities, the number of units lacking complete plumbing facilities, and the number of overcrowded units) and Fourth Round obligation (i.e. prospective need from 2025 to 2035).³ On October 18, 2024, the DCA published non-binding calculations for each municipality. The Town of Dover, according to the DCA's analysis, was calculated to have a Third Round present need of 349 units and the Fourth Round obligation of 113 units.⁴

B. Analysis of Housing Stock

Age of Housing Stock

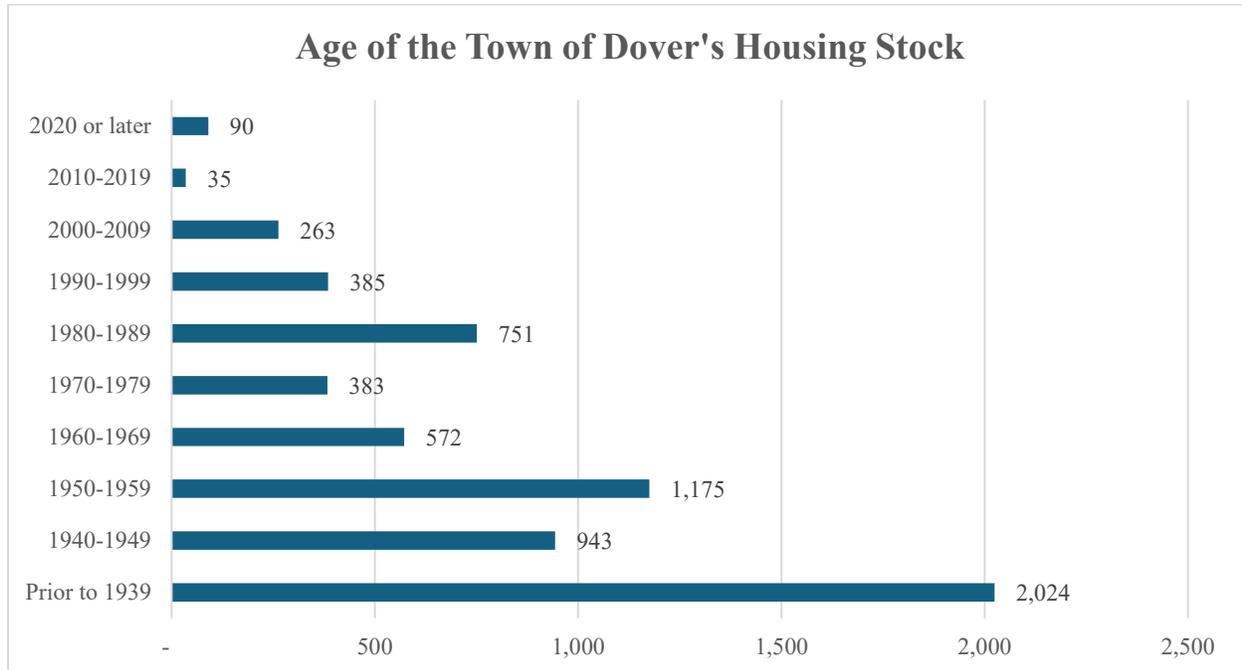

The age of a community's housing stock is considered a means of determining its overall condition and identifying the number of housing units in need of rehabilitation, especially those units constructed 50 or more years ago. The chart below provides data on the age of the housing stock in Dover, beginning with the number of homes constructed prior to 1939, which is an aggregate figure and only provides an initial data point from which to build upon. Overall, the Town of Dover's housing stock has seen a general decline despite two decades of strong construction rates in the 1950s (1,175 units) and the 1980s (751 units) when the number of homes constructed exceeded rates during the prior decades of 1940s (943 units) and 1970s (383 units). In the decades after the construction spikes in the 1950s and 1980s, there were sharp declines in the number of homes constructed during the 1960s and 1990s when the number of homes produced was approximately half of those produced in the prior decade. Since 1989, Dover has constructed 773 new homes over three and a half decades (i.e. 22 more homes produced during the 1980s). Looking closer at the construction rates in recent years, Dover saw a sharp decline in the number of homes built between 2010 and 2020 when the number of homes constructed fell by approximately 87% (totaling 35 units). This decline in home construction coincides with the nation's recovery following the 2008 financial crisis. Since 2020, home

construction in the town has recovered slightly to an estimated 90 units of housing, which represents an increase of 55 homes or a 157% increase from the prior decade.

Condition of Housing Stock

In addition to the age, other factors are taken into consideration to determine the quality and condition of a municipality's housing stock and whether units are substandard. The U.S. Census' 2023 American Community Survey ("ACS") 5-Year Estimate data is used to estimate the number of substandard housing units using the following factors:

1. Persons per room is an index of overcrowding. If 1.01 or more persons occupy one room than the unit is considered substandard.
2. The adequacy of plumbing facilities is used to determine if a unit is substandard. Inadequate plumbing facilities are indicated by either a lack of exclusive use of plumbing facilities or incomplete plumbing facilities.
3. The adequacy of kitchen facilities is also used to determine the quality of a unit and determine if it is substandard. Inadequate kitchen facilities are marked by shared use of a kitchen or the lack of a sink with piped water, a stove, or a refrigerator.

The 2023 ACS indicators presented above were utilized to estimate the presence of substandard housing within the Town of Dover. Table 2 presents the findings of this analysis.

Table 1: Housing Characteristics		
Criteria	Total	Percentage

Other fuel	-	0.00%
No fuel used	-	0.00%
Total	6,455	100.00%

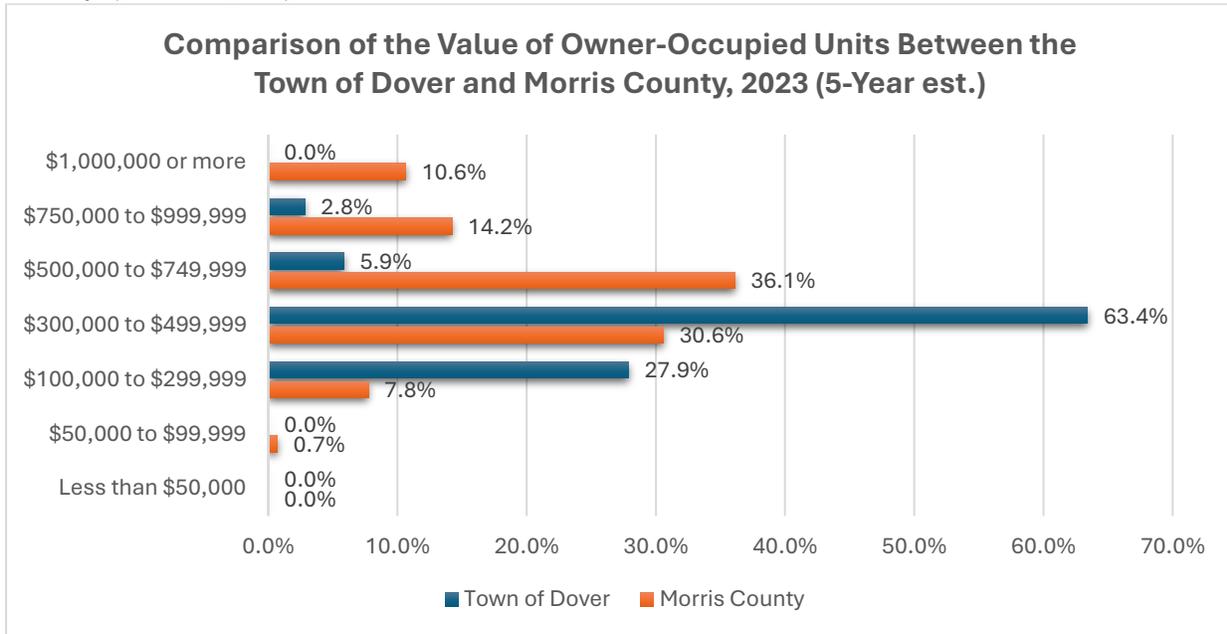

Most of the Census indicators available at the municipal level indicate a sound housing stock. Less than six percent of the units are occupied by more than one (1) person per room, and 100% of the entire housing stock has complete plumbing facilities. Approximately 99.4% of the housing units contain complete kitchen facilities while 97.3% contain telephone services and 91.1% contain internet service. As shown in Table 3, most (86.95%) of the units are heated with standard heating fuels such utility gas, fuel oil, kerosene, bottled, tank, or liquified petroleum (LP) gas. Much of the remaining housing units (12.81%) are heated by electricity.

Purchase or Rental Value of Housing Stock

According to 2023 ACS estimates, the majority (i.e. 63.4%) of the owner-occupied housing stock were valued between \$300,000 and \$499,999, which was more than twice the estimated proportion of homes in that value range across Morris County of 30.6%. The number of owner-occupied housing units with values at or above \$500,000 in the Town of Dover represents a much smaller proportion of the town's owner-occupied housing stock. The number of owner-occupied homes with values between \$500,000 and \$749,999 represents 5.9% of the owner-occupied housing stock, which is approximately six times smaller than the proportion of homes with values in that range across the rest of Morris County (i.e. 36.1%). The number of owner-occupied homes with values at or above \$750,000 in the Town of Dover represents a very small proportion of the overall stock of owner-occupied housing units relative to the rest of Morris County, which is half of the proportion of units in the next lower home value range or 2.8%. As shown in Table 3 below, the median value of an owner-occupied home in the Town of Dover was

¹¹ U.S. Census Bureau, U.S. Department of Commerce. "House Heating Fuel." same period (\$1,759). Most of the rental units (34.1%) in the Town of Dover, according to 2023 estimates, had rents between \$1,000 and \$1,499, which was 11.4% more than the number rental units across Morris County (22.7%) with rents in the same range and during the same period. While the number of rental units in the Town of Dover with estimated rents between \$1,500 and \$1,999 as well as between \$2,000 and \$2,499 represents roughly the same proportion as seen across Morris County, the more striking data points are seen for the proportion of rental units with rents between \$2,500 and \$2,999 or more in the Town of Dover relative to the proportion of such rental units across Morris County. As depicted in the chart below, the proportion of rental units with rents between \$2,500 and \$2,999 is four times smaller (2.2%) than across Morris County (8.8%) and the proportion of rental units with rents of \$3,000 or more in the Town of Dover is approximately eleven and a half times smaller (0.8%) than the proportion of such units across Morris County (9.3%).

Occupancy Characteristics and Type of Housing Units

According to 2023 ACS estimates, there were 6,621 housing units in the Town of Dover, as shown below in Table 5, Housing Units. A total of 79.6 percent were 1-unit detached homes. Of the 18,458 housing units in the Town, only 1,853 (10.0 percent) were 1-unit attached and 636 (3.4 percent) were mobile homes. The housing stock consists primarily of single-family detached housing.

Units Affordable to Low- and Moderate-Income Households

Low-income households are defined as those earning more than 30 percent of the regional median income, but less than or equal to 50 percent of regional median income. Moderate income households earn more than 50 percent of regional median income, but less than 80 percent of regional median income. Following the adoption of the Fair Housing Act (NJFHA) in 1985 and the Uniform Housing Affordability Controls (UHAC), the State of New Jersey (the “State”) developed a sliding scale for income limits, which defines low-and moderate-income limits based on household size. The State, currently through the New Jersey Housing and Mortgage Finance Agency (NJHMFA) following the formal abolishment of COAH on March 20, 2024, has been determining separate incomes for households from one (1) up to eight (8) persons per household. Similarly, housing units are to be priced to be affordable to households who could reasonably be expected to live within the housing units. For example, the current qualifying income for a household of one (1) that is seeking to qualify for an affordable efficiency or studio unit must be at or below \$75,840, as shown below within Table 6.

	1 Person	2 Person	3 Person	4 Person	5 Person
Median	\$94,800	\$108,300	\$121,800	\$135,300	\$146,200
Moderate	\$75,840	\$86,640	\$97,440	\$108,240	\$116,960
Low	\$47,400	\$54,150	\$60,900	\$67,650	\$73,100
Very-Low	\$28,440	\$32,490	\$35,540	\$40,590	\$43,860

¹⁸ U.S. Census Bureau, U.S. Department of Commerce. "Selected Housing Characteristics." American Community Survey, ACS 5-Year Estimates Data Profiles, Table DP04, 2023, <https://data.census.gov/table/ACSDP5Y2023.DP04?q=Dover+town,+New+Jersey&t=Renter+Costs:Units+and+Stories+in+Structure&y=2023>.

¹⁹ New Jersey Housing Mortgage and Finance Agency, UHAC 2025 Affordable Housing Regional Income Limits by Household Size (2025). State of New Jersey. Retrieved from https://www.nj.gov/dca/hmfa/about/regulations/docs/UHAC_Income%20Limits.pdf.

To be affordable, a household should not be paying more than 28 percent of its gross income on principal, interest, taxes and insurance, subsequent to a minimum down payment of 5 percent. A rental unit is affordable if the household is paying no more than 30 percent of its income on rent and utilities. The following tables display the percentage of household income that is used for housing cost payments.

Income Ranges	Percentage of Income	Number of Households	Percentage of Total Number of Households

C. Projected Housing Stock

According to the New Jersey Department of Community Affairs, the Town of Dover has issued building permits for a total of 313 single family housing units, multifamily housing units, and mixed-use housing units between 2013 and 2023.²²

Using New Jersey Department of Community Affairs (NJDCA) demolition data for the same period, the Town of Dover approved 25 demolition permits. This brings the net number of housing units added between the year 2013 and 2023 to 292. The building and demolition permit information is depicted within Table 9 below.²³

Table 9: Dwelling Units Authorized									
Year	Residential Building Permits Issued for New Construction				Residential Demolitions				Total Added

D. Municipal Demographic Characteristics

As depicted in the chart below, the population of the Town of Dover has experienced steady population growth throughout the 20th Century, which included an almost doubling in population from 5,938 in 1900 to 11,174 in 1950. From 1950 to 2000, the Town of Dover saw a population increase of 7,014 residents to 18,188, which represents an increase of approximately 63%. Since 2000, population growth has slowed substantially to a current estimated count of 18,420, which represents an increase of only 232 residents, which represents an increase of approximately 13%. The North Jersey Transportation Planning Authority (NJTPA) conducted population projections for its jurisdiction which included the Town of Dover. The projections were calculated and estimated in January 2012. The projections show that the Town will keep growing through 2035. NJTPA's projections show a population increase of approximately 37% over the next ten years or until the end of the state's Fourth Round period.

Population density is a measure of the number of people residing within a given land area. As the table shows, Howell is of relatively low density given the amount of land area the Towns occupies. The table below displays Howell Town's population characteristics and projections.

Year	Population	Population Change	Percentage Change
1900	5,938	-	-
1910	7,408	+1,470	24.76%
1920	9,803	+2,395	40.33%
1930	10,031	+228	3.84%
1940	10,491	+460	7.75%
1950	11,174	+683	11.50%
1960	13,034	+1,860	31.32%
1970	15,039	+2,005	33.77%
1980	14,681	-358	-6.03%
1990	15,115	+434	7.31%
2000	18,188	+3,073	51.75%
2010	18,157	-31	-0.52%
2020	18,460	+303	5.10%
2023	18,420	-40	-0.67%
2035	20,610	+2,190	36.88%

As illustrated within Table 11, the age cohort breakdown of the Town of Dover is quite similar to that of the rest of Morris County. In addition, the residents of the Town of Dover and the residents of Morris County are close in the estimated median age. A breakdown of population by age for the town and the county is provided below:

Age Cohort	Town of Dover ²⁴		Morris County ²⁵	
Under 5 Years	735	3.99%	25,471	4.99%
5 to 14	2,171	11.79%	59,800	11.72%
15 to 24	2,437	13.23%	62,757	12.30%
25 to 34	2,344	12.73%	57,194	11.21%
35 to 44	2,523	13.70%	65,510	12.84%
45 to 54	2,626	14.26%	72,196	14.15%
55 to 64	2,893	15.71%	76,688	15.03%
Over 65	2,691	14.61%	90,759	17.78%
Total	18,420	100%	510,375	100%
Median Age	41		42.7	

As race is an important indicator of the equity and economic opportunity for all residents of a community, an analysis was performed on the change in the racial composition of the Town of Dover. As indicated below in Table 12, there were some significant changes in the population of residents who identified as white and residents who identified with another race. From 2010 to 2023, there was a sharp decline of approximately 57.8% (or 6,989 residents) in the number of white residents from 12,083 to 5,094. However, the opposite was observed during the aforementioned period for residents who identified with another race and those who identified with two or more races. For those who identified with some other race, there was an increase of approximately 113.3% (or 4,091 residents) from 2010 and 2023. For those who identified with two or more races, there was an increase of approximately 430.4% (or 3,323 residents). There were no significant population changes among other racial groups in the town. Overall, there was a net population increase of 263 residents from 2010 to 2023.

As shown in Table 13 below, the Town of Dover has become predominantly comprised of residents who identify as Hispanic or Latino. From 2010 to 2023, the population of Hispanic or Latino residents grew from an already significant proportion of approximately 67.5% in 2010 to approximately three-quarters (or 75%) of the town's population in 2023.

Table 13: Hispanic or Latino Population

According to 2023 ACS estimates, the median household income in the Town of Dover was \$70,519. This was a little less than half of the median income for Morris County, which was \$134,579. A distribution of households by income for the Town of Dover and Morris County is presented within Table 12, Households by Income (\$) in 2023, below.

Table 14: Number of Households by Income 2023 (est.)		
Income	Dover	Morris County
Less than \$10,000	268	4,493
\$10,000 to \$14,999	134	2,859
\$15,000 to \$24,999	436	6,191
\$25,000 to \$34,999	550	7,005
\$35,000 to \$49,999	722	9,839
\$50,000 to \$74,999	1,499	19,569
\$75,000 to \$99,999	839	19,609
\$100,000 to \$149,999	1,118	35,673
\$150,000 or more	889	87,954
Median Household Income	\$70,519	\$134,579

The average household size in the Town of Dover in 2023, according to 2023 estimates, was 2.95 persons per household. The town had a total of 6,455 households. Of which, 57.2% or 3,697 were a part of family households, and 42.7% or 2,758 households were a part of non-family households. The distribution of household types is illustrated within Table 15, Household by Types in 2023, below.

Table 15: Households by Type from 2023 (est.)		
Household Type	Number	Percent
Total households	6,455	100%
Married-couple household:	3,023	46.8%
With children of the householder under 18 years	1,556	24.1%
With no children of the householder under 18 years	1467	22.7%
Cohabiting couple household:	674	10.4%
With children of the householder under 18 years	348	5.4%
With no children of the householder under 18 years	326	5.1%
Female householder, no spouse or partner present:	1,751	27.1%
Living alone	1,003	15.5%
With children of the householder under 18 years	194	3.0%
With relatives, no children of the householder under 18 years	505	7.8%
With only nonrelatives present	49	0.8%
Male householder, no spouse or partner present:	1,007	15.6%
Living alone	465	7.2%
With children of the householder under 18 years	61	0.9%
With relatives, no children of the householder under 18 years	425	6.6%
With only nonrelatives present	56	0.9%
<i>Source: 2023 ACS 5-Year Estimate, Households by Type</i>		

E. Employment Characteristics

A major factor determining the affordability of housing in a community is the composition of the workforce. As shown below in Table 16, 2023 ACS estimates indicated that there was a total of 10,391 residents who were 16 years and older, of which 9,107 (or 87.6%) work in the private sector and 740 were government employees.²⁶

	Number	Percentage of Total
Private for-profit wage and salary workers	9,107	87.6%
Government workers	740	7.1%
Self-employed in own not incorporated business workers	530	5.1%
Unpaid family workers	14	0.1%
Total	10,391	100.0%

An analysis of the employees (over the age of 16) indicates that workers residing in the Town of Dover were involved in a broad array of economic sectors. As depicted in Table 17 below, the highest concentration of workers at 15.7% (or 1,636 employees) of the total workforce was in professional, scientific, and management, and administrative, and waste management services. The next largest sector of employment in the town was educational services, and health care and social assistance, which constituted 15% (or 1,562 employees) of the workforce. When compared with the rest of Morris County, the first and second largest employment sectors in the town are in the reverse with respect to the rest of the county in which the educational services, and health care and social assistance represents 22.7% (of 61,498 workers) and professional, scientific, and management, and administrative, and waste management services represents 17.2% (or 46,480 workers) of the overall workforce.²⁷

²⁶ U.S. Census Bureau, U.S. Department of Commerce. "Selected Economic Characteristics." American Community Survey, ACS 5-Year Estimates Data Profiles, Table DP03, 2023, <https://data.census.gov/table/ACSDP5Y2023.DP03?q=Dover+town,+New+Jersey&t=Class+of+Worker:Employment:Industry&y=2023>.

²⁷ Ibid.

Arts, entertainment, and recreation, and accommodation and food services	1,198	11.5%	17,628	6.5%
Other services, except public administration	568	5.5%	10,296	3.8%
Public administration	171	1.6%	9,214	3.4%
Total	10,391	100%	270,937	100%

In addition, in order to understand what implications this employment data has for the Town and to understand what the employment field and area trends are for Town of Dover and Morris County, the New Jersey Department of Labor (“NJL”) has prepared projections, which analyze the expected increase or decrease in a particular employment sector by the year 2032. This data has been summarized and is illustrated within Table 18.

Table 18: Morris County Projected Employment				
Industry	2022 Estimated Employment	2032 Projected Employment	Numeric Change	Outlook
Utilities	524	525	+1	Stable
Construction	12,493	12,677	+184	Stable

Government	13,901	13,808	-93	Declining
Total (All Industries)	342,405	358,579	+16,174	Stable
<i>Source: New Jersey Department of Labor and Workforce Development, Industry Projections 2022-2032 (Industry Sector Information)</i>				

As indicated above in Table 18, it is projected that by 2032 employment will increase in many industries and overall the economy is expected to grow by 16,174 jobs in Morris County. Professional, scientific, and technical services are anticipated to realize the largest growth increase during the 2022-2032 time period.

Fair Share Plan

A. Introduction

The Mt. Laurel decisions established that every municipality is responsible for its “fair share” of a regional affordable housing need. COAH, pursuant to the Fair Housing Act, was responsible for defining regions and developing criteria for establishing each municipality’s share of the regional need. The Town of Dover is located within Affordable Housing Region 2, consisting of Essex, Morris, Union, and Warren Counties.

As previously mentioned, on December 20, 2004, COAH’s third round substantive and procedural rules became effective. On January 25, 2007, the Appellate Division of the Superior Court of New Jersey delivered an opinion which sustained, and invalidated certain sections of N.J.A.C. 5:94. In particular, this opinion affected all municipalities’ ability to precisely determine their Cycle III affordable housing fair share, and also called into question certain compliance techniques used since December 20, 2004 to address “growth share” obligations. COAH subsequently adopted revised third round regulations resulting from the Appellate Division decision, which became effective on September 22, 2008. The third round rules employ a significantly different methodology than the first and second round rules. COAH adopted a “growth share” methodology, in which the need for affordable housing is based upon projected growth by a municipality, instead of the municipality being assigned a specific number of new construction affordable units to be provided independent of actual growth.

In 2013 the Supreme Court affirmed the Appellate Division’s decision and directed COAH to adopt new rules, based on the Prior Round methodology; however, the COAH board reached an impasse at its October 2014 meeting and failed to adopt any Third Round rules. To establish an orderly compliance review and approval process by trial courts, the Supreme Court provided a 90 day period before its decision would take effect, on June 8, 2015. The Court also established a 30 day deadline, July 8, 2015, for municipalities that had been in the COAH process to file a declaratory judgment and seek judicial review of their fair share housing plans by trial courts. On and after July 9, 2015 interested parties were able to file noncompliance action against a municipality.

Following the July 8, 2015 deadline to file a declaratory judgment, accepted municipalities were given five (5) months to complete a Third Round Housing Element and Fair Share Plan. The Supreme Court stated that Third Round housing obligations are to be determined based on the First and Second Round rules.

The Town of Dover’s Fair Share Plan is broken up into a Present Need or Rehabilitation Obligation and Prospective Need Obligation. The Town’s fair share obligations were calculated by the Department of Community Affairs that was published on October 18, 2024. The table in Section F outlines the Town’s affordable housing obligation.

B. Content of Fair Share Plan

The Fair Share Plan contains the following information:

- Description of existing credits intended to satisfy the obligation;
- Description of mechanisms that will be used to meet any outstanding obligation; and
- An implementation schedule that sets forth a detailed timeline for units to be provided.

In adopting its housing element, a municipality may provide for its fair share of low- and moderate-income housing by means of any technique or combination of techniques that provide a realistic opportunity for the provision of the fair share. As per N.J.A.C. 5:93, these potential techniques include but are not limited to:

- Rehabilitation of existing substandard housing units;
- ECHO units (as a Rehabilitation credit);
- Municipally-sponsored and 100% affordable developments;
- Zoning for inclusionary development;
- Alternative living arrangements;
- Accessory apartment program;
- Purchase of existing homes;
- Write-down/buy-down programs; and
- Assisted living residences

C. Regional Income Limits

Dwelling units are affordable to low- and moderate-income households if the maximum sales price or rental cost is within their ability to pay such costs, based on a specific formula. The State provides income limits based upon the median gross household income of the affordable housing region in which the household is located. A moderate-income household is one with a gross household income equal to or more than 50%, but less than 80%, of the median gross regional household income. A low-income household is one with a gross household income equal to 50% or less than the median gross regional household income. Very low-income households are those with a gross household income equal to 30% or less of the median gross household income.

As noted in Table 6 of the Housing Element and again in Table 1 below, New Jersey's Department of Community Affairs' (DCA) 2025 regional income limits establishes that a four-person moderate-income household has a cap of \$108,240 in Region 2. Single-person households could make up to \$75,840 and be considered a moderate-income household or earn up to \$47,400 and be considered a low-income household.

	1 Person	2 Person	3 Person	4 Person	5 Person
Median	\$94,800	\$108,300	\$121,800	\$135,300	\$146,200
Moderate	\$75,840	\$86,640	\$97,440	\$108,240	\$116,960
Low	\$47,400	\$54,150	\$60,900	\$67,650	\$73,100
Very-Low	\$28,440	\$32,490	\$35,540	\$40,590	\$43,860

D. First and Second Round Obligation

As noted above, The Town of Dover began its Mount Laurel and Fair Share Housing Act compliance on July 24, 1996, when the Town adopted a Second Round Housing Element, which was followed by a petition to the then-Council on Affordable Housing (COAH) for substantive certification for the 1987-1999 period and receiving substantive certification on December 4, 1996 (Resolution No. 64-99). The Town was given a 6-unit Present Need or Rehabilitation obligation by COAH for the 1987-1999 period. The Town addressed this entire obligation at that time.

E. Third Round Obligation

As noted above, The Town's Third Round obligation for the 1999-2025 period required an agreement with a Supreme Court-designated interest party, the Fair Share Housing Center (FSHC), following their report published on May 17, 2016. The FSHC report calculated a Present Need or Rehabilitation obligation of 312 units, Prior Round (1987-1999) obligation of 6 units, Third Round Gap Period (1999-2015) obligation of 105 units, and a Third-Round obligation of 150 units. Following the submission of a settlement agreement with the FSHC to the Court on June 16, 2016, a Third-Round obligation of 178 units was established. The Town addressed its Third-Round obligation with a Housing Element and Fair Share Plan adopted on August 24, 2016. The 2016 Housing Element and Fair Share Element included three 100% affordable housing projects, all of which have been constructed, along with carryover surplus family housing credits and carryover senior housing credits from the Prior Round. The table below indicates the status of these projects above.

Site	Credit Type	Credits	Status
Habit for Humanity, Harding Avenue	100% affordable	4	Completed
Habitat for Humanity, Monmouth St.	100% affordable	1	Completed
Pennrose Properties Veterans Housing	100% affordable	114	Completed
Carry-over Credits from Prior Round		59	Completed
Totals		178

F. Fourth Round Obligation

The total cumulative affordable housing obligation consists of two components: the Present Need (Rehabilitation) and Prospective Need (New Construction). The Town of Dover's prospective need of 113 units represents 0.55% of the Region 2's total prospective need of 20,506 units.

Fourth Round Obligation	
Present Need (Rehabilitation) Obligation	349
Prospective Need (New Construction) Obligation	113
Total Fourth Round Obligation	462

G. Present Need (Rehabilitation) Obligation

As indicated above, Dover has a Present Need (Rehabilitation) obligation for the Fourth Round of 349 units. The Town will address this obligation by continuing to administer the Town's municipal Home Improvement Program, which is available to both owners and renters. In addition, the Town will continue to participate in the Morris County Housing Rehabilitation Program, which is established through an interlocal agreement and utilizes Community Development Block Grant (CDBG) funds. The Town will utilize funds from the Town's affordable housing trust fund to fund this program.

Pursuant to COAH's rules that allow municipalities to utilize money collected from development fees for this purpose, the Town shall set aside monies from its affordable housing trust fund account to be made available to income-qualified households to participate in the program. A copy of the Town's Fourth Round Spending Plan is appended to this Fair Share Plan.

H. Prospective Need (New Construction) Obligation

As established in Section F above, Dover has a Fourth Round Prospective Need obligation of 113 units. The Town will satisfy the entirety of this 113-unit obligation through six (6) redevelopment sites, as listed below.

Site	Affordable Units (1)	Bonus Credits (2)	Total Credits
Block 1902 Lots 22-28 (QOZB)	26	↓	↓
Habitat for Humanity (W. Munson)	4	↓	↓
Block 1201 Lot 6 (Bassett Site)	17	↓	↓
Block 1803 Lot 11 (Lot "B")	13	↓	↓

Block 1219 Lot 4 (Lot "C")	13	↓	↓
Block 510 Lot 6 (NJ Transit Yard)	12	↓	↓
Totals	85	28	113

Footnotes:

- (1) Affordable unit count based on location and ownership (private vs public)
- (2) Bonus credits are applied for redevelopment, transit-oriented development (TOD), and age-restricted housing, up to 25% of the municipality's Prospective Need (see below).

In New Jersey's Fourth Round of affordable housing mandates, municipalities can earn bonus credits to reduce their overall affordable housing obligation. These bonuses are capped at 25% of the municipality's prospective need. Several types of projects can qualify for bonus credits, including those with special needs housing, those developed by non-profit organizations, and those located near transit options, among others. Types of bonus credits include the following:

- Special Needs Housing: One full bonus credit is available for units in special needs housing.
- Non-Profit Developer Housing: Half a bonus credit is awarded for units developed by a non-profit developer.
- Transit-Oriented Affordable Housing: Half a bonus credit is given for affordable housing units located within a half-mile of transit (rail or bus).
- Age-Restricted Housing: Half a bonus credit is available for age-restricted units, but only up to 15% of the total age-restricted housing provided.
- Three-Bedroom Family Housing: Half a bonus credit is granted for three-bedroom family units exceeding the minimum requirements set by the Uniform Housing Affordability Controls (UHAC).
- Redevelopment: Half a bonus credit is awarded for affordable housing units developed on land previously used for commercial, retail, or office space.
- Rental Affordability Controls: Half a bonus credit is given for extending rental affordability controls on existing units.
- 100% Affordable Development: Half a bonus credit is granted for developments where the municipality provides land or funding for at least 10% of the project cost, and the development is 100% affordable.
- Very Low-Income Units: Half a bonus credit is awarded for each very low-income unit exceeding the minimum required number.
- Market to Affordable Units: Half a bonus credit is given for units that are converted from market-rate to affordable, and the municipality has site control or an agreement with the landowner.
- Supportive and Special Needs Bedrooms: One full bonus credit is given for supportive and special needs bedrooms.

A description of the sites to satisfy the Fourth Round Prospective Need Obligation follows:

Block 1201 Lot 6 (Bassett Highway Site)

The property comprises approximately 9.36 acres adjacent to the Rockaway River and within short walking distance of the NJ Transit Train Station. It is developed with an old commercial/industrial building along the property’s Bassett Highway frontage. The site is dominated by a large surface parking lot behind the building that extends to the river. Maps and photographs are provided below. The entire site has been declared an area in need of redevelopment. The Town recently adopted a redevelopment plan that permits multilevel multifamily or mixed-use development and requires 17 affordable units.

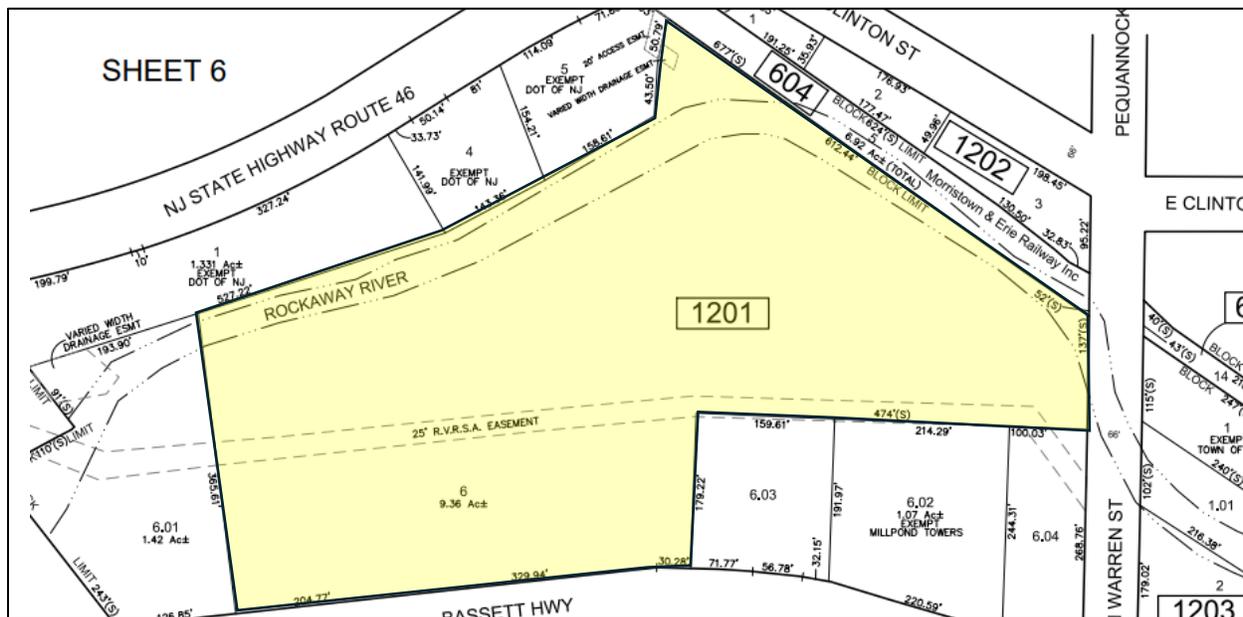

Figure 1 – Tax Map of Subject Site

Figure 2 – Aerial satellite image of subject site

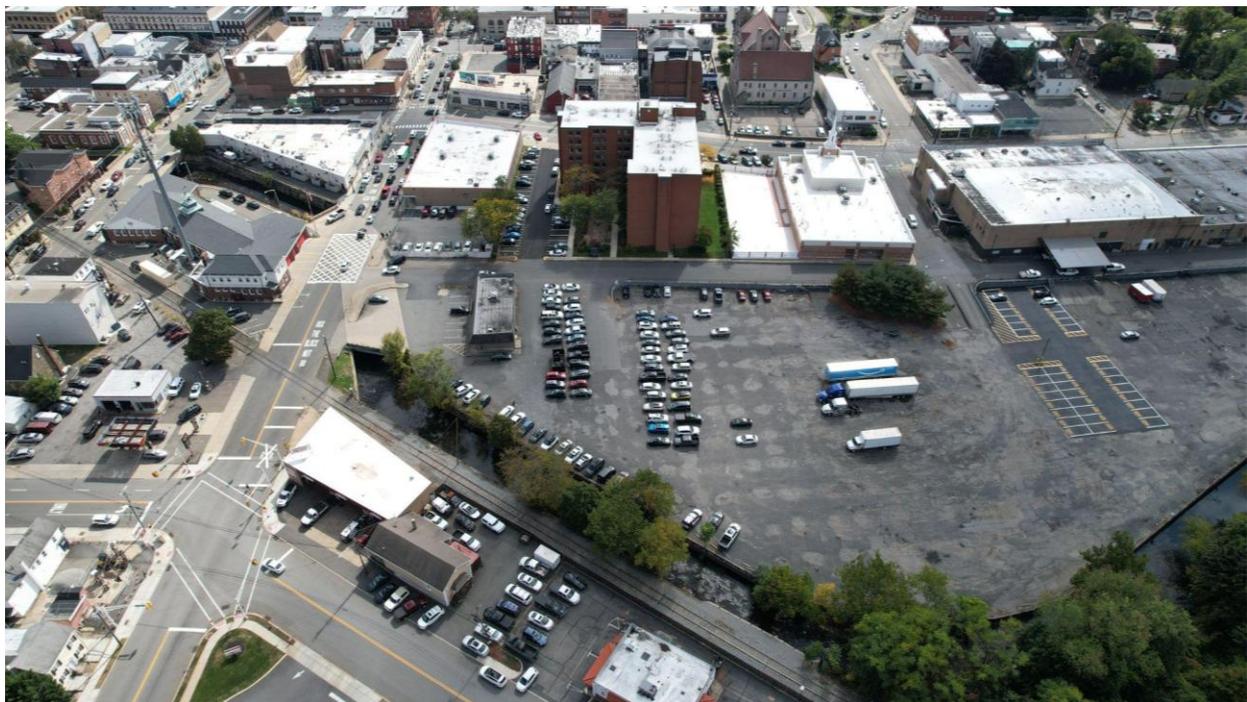

Figure 3 – Aerial drone photograph of subject site

Figure 4 – Ground photograph of subject site

The Bassett Highway site (Block 1201 Lot 6) satisfies the regulatory criteria of N.J.A.C. 5:93-1 that sites designated to produce affordable housing shall be available, approvable, developable and suitable, as follows:

- **“Available site” shall mean a site with clear title, free of encumbrances which preclude development for low- and moderate-income housing.**

The site satisfies this criterion because it has clear title and is free of encumbrances which preclude development of affordable housing. The site is controlled by parties with ongoing and approved residential development projects and is available to help the municipality meet its Prospective Need obligation. The site is predominately paved over. The site is in a flood zone but based on preliminary analysis it can be developed in accordance with NJDEP regulations and in accordance with the rules and regulations of all agencies with jurisdiction over the site. The site is within walking distance of the train station.

- **“Suitable site” shall mean a site that is adjacent to compatible land uses, has access to appropriate streets and is consistent with the environmental policies delineated in N.J.A.C. 5:93-4.**

The site satisfies this criterion because it is adjacent to compatible land uses and has access to appropriate streets and is consistent with the environmental policies delineated in N.J.A.C. 5:93-4. The site is well suited for inclusionary development because it has excellent accessibility and connectivity to mass transit, downtown amenities, a future river walk, and regional and local road networks; and because inclusionary housing is compatible with the variety of uses in the area. The site is also well suited for inclusionary
